

Foliar Nutrient Delivery

Manni-Plex® B Moly

BRANDT MANNI-PLEX Advantage

Growers have been discovering the reliability and effectiveness of BRANDT MANNI-PLEX technology for over a decade. Its unique chemistries deliver more nutrients to plants' active metabolic sinks, faster. The result: stronger, healthier plants and improved yield.

- Natural humectant properties improve foliar contact and adhesion
- Plants view BRANDT MANNI-PLEX as a natural substance, which increases uptake and absorption
- Molecular structure helps more nutrients penetrate the leaf and move through the plant quickly
- Can be tank mixed with most insecticides, fungicides and plant growth regulators

MANNI-PLEX B MOLY

MANNI-PLEX B MOLY contains two key micronutrients, Boron (B) and Molybdenum (Mo), which help plants convert nitrogen to ammonium and improve nitrogen metabolism. The result: improved root nodulation, more fruit and flowering, and increased yield.

- B and Mo combination is more effective than individual applications
- Enhances nitrogen fixation
- Promotes healthy cell formation, structural integrity, new growth and pollen production
- Improves sugar translocation from plant leaves to roots, tissue, seeds, flowers and fruit
- Can be used on legumes corn, cotton, conola, alfalfa grapes and vegetable crops

Minimum Guaranteed Analysis

5-0-0

Total Nitrogen (N)	5.0%
5.0% Urea Nitrogen	
Boron (B)	3.3%
3.3% Water Soluble Boron (B)	
Molybdenum (Mo)	0.5%
0.5% Water Soluble Molybdenum (Mo)	

Derived from Urea, Sodium Borate and Sodium Molybdate.

The addition of Boron to legumes helps increase root nodulation formation and nitrogen fixation.
